STRAWBERRY PLANTS

RASPBERRY, BLACKBERRY, GOOSEBERRY, CURRANT, GRAPE, ASPARAGUS, RHUBARB, VEGETABLE AND FLOWERING PLANTS.

1915—CATALOGUE AND PRICE LIST—1915

HARRY L. SQUIRES

REMSENBURG, N. Y.  GOOD GROUND, N. Y.
NINETEEN HUNDRED FIFTEEN

Once again I am pleased to greet my many customers who have dealt so generously with me in the past. I thank them heartily for their patronage. I especially thank those who have sent me testimonials and those who have recommended my stock to their neighbors and friends from whom I have received many orders. As I am in business for the future as well as the present, it will be my constant endeavor to have every customer not only satisfied but so well pleased that, when opportunity offers, he will not hesitate to speak a good word for me and for the stock I sell.

Trusting that I shall continue to receive a share of your patronage, and hoping that this may be a successful and prosperous year for you, I am,

Very truly,

HARRY L. SQUIRES.

INSPECTION CERTIFICATE

CERTIFICATE OF INSPECTION OF NURSERY STOCK.

This is to certify that the stock in the nursery of Harry L. Squires of Remsenburg, County of Suffolk, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1915.

Dated, Albany, N. Y., December 31, 1914.

CALVIN J. HUSON,
Commissioner of Agriculture.

AGENTS WANTED

To Sell Fruit Trees, Berry Plants, Vegetable Plants, Seeds and Other Stock Listed in This Catalogue.

Ask For Terms to Agents.

BEFORE ORDERING READ THE FOLLOWING CAREFULLY.

HOW TO ORDER. Send in your orders as early as possible. Remember that in the busy shipping season delays are always liable to occur, sometimes on account of a rush of orders, sometimes on account of bad weather, and sometimes from other causes. Be sure to write plainly your name, post office, county and state, each time you write, and also give your shipping address if it is different from your post office address. Be particular to state how stock is to be shipped, whether by mail, express or freight. I never ship by freight unless requested to do so, and then only at the purchaser's risk. Some things, such as trees, asparagus roots, rhubarb roots, seeds, etc., may be safely shipped by freight, but for most things freight shipment is very risky. All orders will be promptly acknowledged, and notice will be sent when goods are shipped except where forwarded at once by mail.
PRICES in this catalogue abrogate all previous quotations. The prices quoted are for the quantities specified, but six may be ordered at dozen rate, fifty at hundred rate except where prices are given for fifty, six hundred at thousand rate, pints at quart rate, half bushels at bushel rate, and half pounds at pound rate.

GUARANTEE. I warrant all stock that I sell to be true to name, with the explicit understanding that should any prove otherwise, I will refund the money paid or replace it with other stock, but I am not liable for damage beyond this. I do not guarantee the crop, as too many conditions enter into the successful growing of any crop. I guarantee that all orders shall be filled with first class stock, and that, when shipped by mail or express, it shall reach customers in good condition when promptly taken from the railroad station or post office and opened at once. If plants or other stock shipped by express are delayed too long in transit and arrive in a worthless condition, ask your express agent to indicate plainly on the express receipt the delay and worthless condition of the shipment. Then mail the express receipt to me at once, with a memorandum of your original order, which will be duplicated promptly free of charge, and the express company will make good to me for the stock. But this notification must be made promptly.

CLAIMS. If through error, accident or other cause, a shipment of stock should prove unsatisfactory, notify me at once, and the matter will be satisfactorily adjusted. But such notification must be made within ten days after receipt of stock.

TERMS OF PAYMENT. Invariably, cash in advance. Money may be sent by whatever method is most convenient.

PREPAID PRICES. As most people like to know, when ordering stock, just what the total cost will be, and prefer to have it shipped prepaid, I have quoted a list of prepaid prices on everything named in this catalogue except seeds by the peck and bushel, and fertilizers. Plants and trees at these prices will be shipped prepaid to any part of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, Ohio, New Jersey, Delaware, Maryland, Virginia, and West Virginia. Stock will be shipped by mail or express (at my option), except pot grown strawberry plants, rhubarb roots and trees, which will always be shipped by express. When requested to do so I will ship plants by mail in lots not larger than the following: 250 strawberry, vegetable or small flowering plants; 100 asparagus; 50 grapes, gooseberries or currants; 100 raspberries or blackberries; 12 roses or other shrubs, and similar sized lots of other stock of about the same sizes. Seeds at the prices quoted, except by the peck and bushel, will be shipped by mail postpaid to any part of the United States. On most kinds of stock I have also quoted prepaid prices for which small lots will be sent by mail postpaid to any part of the United States. Besides these prepaid prices, I have quoted a list of prices for all kinds of stock shipped by express not prepaid. Where possible I advise customers to order at the prepaid prices, for in many cases the amount I have added to cover transportation charges is much less than the actual cost will be. But, of course, customers living in other states than those named will have to order plants and trees at the prices which do not include transportation charges, except when ordering small lots to be sent by mail. If through error an express shipment should reach you not prepaid when you have ordered at prepaid prices, notify me at once, sending me the express receipt, and I will promptly forward to you the amount you have to pay the express company.

SHIPPING POINTS. You will notice that stock is shipped from several different shipping points, and your order may be filled in more than one shipment. By ordering at the prepaid prices, all uncertainty as to transportation charges will be avoided, as you will have none to pay. If you do not live in any of the states to which stock is shipped prepaid, let me know what you wish to buy and I will promptly quote you prepaid prices.

PACKING. All shipments will be carefully packed and packages will be as light as is consistent with good packing. No extra charge will be made for boxing and packing, but bags in which potatoes and other seeds are shipped by the bushel will be charged for at cost.

NEW PLANTS. All strawberry plants are freshly dug from new beds.

F. O. B. ORDERS. No stock will be sent C. O. D.

SUBSTITUTION. It is my custom, should the supply of any variety become exhausted (which will occasionally occur), to substitute in its stead a similar sort. When it is desired that I shall not do this it must be so stated in the order. To simply affix the words "No substitution" is all that is necessary.

LARGE ORDERS. Special prices will be promptly quoted on large orders.
BERRY PLANTS IN LATE SPRING. I cannot guarantee safe delivery of berry plants after May 15th, as they are then too far advanced in growth to be satisfactorily shipped or transplanted. If requested to do so, I can usually ship them up to June 1st, but will do so only at the buyer's risk after May 15th. Strawberry plants can be successfully planted during the late summer and fall, and instead of planting them in the late spring I advise that they be planted during August and the fall months. They will cost a little more at that time, because when digging them, while they are growing, many young plants are destroyed, but they will give far better results than late spring plants. Prices are given in the price list on another page. After about Aug. 20th and until cold weather, I can supply strong, well-rooted young plants, grown from beds planted in the spring. The earliest and best of these plants are grown in Maryland, and shipped from there directly to my customers. These plants are two or three weeks further advanced in growth at this time than plants grown in this latitude, and being much larger and better rooted, will make a better and more rapid growth. This is an important gain when planting strawberries in the summer and fall, for the more growth they make the larger will be the crop of berries the next summer. Raspberry, blackberry, gooseberry and currant plants can be shipped, usually, the latter part of September, or early in October, and the prices will be the same as for spring.

VARIETIES NOT LISTED. If you want any varieties not listed in this catalogue, I can probably get them for you and shall be pleased to do so, at market prices.

REFERENCE: Center Moriches Bank, Center Moriches, N. Y.

STRAWBERRY CULTURE

Strawberries give the greatest yield and the largest berries when grown in rich, well-manured soil; hence no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal coating of well-rotted stable manure. Harrow or rake down finely, and if at this time a top dressing of ground bone can be applied it will be found a great benefit at fruiting time. Before planting the roots of the plants should be shortened about one-third, which will cause them to send out a profusion of new fibers. In planting expose the plants as little as possible to the wind or sun. Do not plant very deeply, but be sure to press the soil firmly about the roots. For hill culture in the family garden, set in rows two feet apart and the plants fifteen inches apart in the rows, cutting off all runners as they appear. For field culture, where they can be worked by horse and cultivator and permitted to form matted rows, plant in rows three or four feet apart with the plants from twelve to eighteen inches apart in the rows. If set in rows three feet apart with the plants one foot apart in the rows, an acre will require 14,520 plants. If set in rows three and a half feet apart with plants fifteen inches apart in the rows, an acre will require 9,953 plants.

The after culture consists in keeping the soil mellow and free from weeds by frequent hoeing or cultivation. At the approach of winter cover the entire bed with saltmeadow hay or other loose light material. When the plants "start" in the spring, rake the mulch from off the plants sufficiently to permit them to push through it, and leave it on the surface about the plants, to protect the fruit and keep it clean and also keep the soil moist and cool.

The blossoms of all strawberries in cultivation are either hermaphrodite (perfect) or pistillate (imperfect). When planting varieties having imperfect blossoms, every fourth row should be planted with a perfect flowering variety.

It is best always to plant at least three varieties—early, medium and late—to expand the season of fruiting to its full limits. Then by planting some of the Ever-bearing or Fall bearing varieties, the fruiting season can be made to continue throughout the entire summer and fall.

---

STRAWBERRIES FOR PROFIT

There are thousands of strawberry growers who recognize that industry as their vocation. It is a proven fact that the professional berry grower is making more money to-day than any farmer who depends on the ordinary farm crop for his entire earnings. Acreage considered, the berry grower has the best of the argument from start to finish. The investment which produces a $5,000 strawberry crop is but a small per cent. of the investment needed to produce $5,000 worth of wheat, garden truck or potatoes. Straw-
berry growing has not only become a great business, but a profitable one. Thousands of acres are under strawberry cultivation, and thousands of people are employed in growing, harvesting and caring for the crops which find their way, not only into the largest cities, but into every small city and town throughout the country. While this industry is growing, the cities and towns are growing equally—even faster—therefore there is an increasing demand for good berries. The outlook for the strawberry grower was never better. He is dealing in a staple commodity that is, year after year, becoming more and more a world necessity. In this connection read the following articles taken from Green’s Fruit Grower and The Rural New Yorker:

INTENSIVE BERRY CULTURE

We are busy harvesting a two-thirds crop of strawberries, about 8,000 quarts on two acres; but prices are good. The first 3,000 quarts sold for from 16 to 20 cents per quart; now selling from 11 to 12½ cents. I shall not complain, as I raised 1,000 bushels of onions last season between the rows of strawberries, which were set last spring. I also sold 100,000 strawberry plants this spring at $4.00 per 1,000. I shall finish picking strawberries by the middle of first week in July, shall plow and plant shell and butter beans. I am practically sure of a crop of butter beans, but the shell beans possibly may be cut by a frost. I shall take my chances, as very late beans generally sell for a good price, and land is quite high and escapes most of the early frosts. You see we have to work the land for all it is worth. I shall sow clover seed about the first of September at the last cultivating of the beans to plow under next spring.—B. King, Middlesex Co., Mass., in Rural New Yorker.

A FARM THAT RAISES 3,000 BUSHELS OF STRAWBERRIES YEARLY

After 30 years of experience in raising strawberries, George W. Spaulding, of Somerset County, Maine, has found that this is one of the best crops that can be raised, even for the ordinary farmer. He has established an industry in this line and has proved that a farmer may live twenty-five miles from a market, yet he can make this branch of farming successful. He employs through the summer as many people as any industry in the community where he lives.

Thirty years ago Mr. Spaulding, then a young man, lived with his parents upon a farm of ordinary soil with the same conditions to contend with that most New England farmers have. He conceived the idea of growing vegetables for the market, and for many years raised about 3,000 heads of cabbages besides large quantities of dandelion greens. He found these profitable, but he was not satisfied and began to raise raspberries. These too, proved profitable, but still he was in for doing something bigger. He then set out an acre of strawberries, and from this acre have grown the six acres that he now plans to have each year. He harvested four acres this year, and though this year did not produce the usual yield, he found the crop to be profitable. Through the summer months he employs about twenty-five hands to do the picking.

He says there is always a market for his berries. He realizes in an ordinary year about four dollars per bushel, and an acre will yield him a profit of between $400.00 and $500.00.

Raising strawberries thirty years has given a man experience to make his methods interesting to other growers. Mr. Spaulding plows his ground as he would for any other crop. He does this in the fall in order to give the weeds a chance to kill out during the winter months. In the spring of the year he harrows his ground thoroughly, making this one of the chief points in raising strawberries. He puts about half a ton of phosphatic acid, and in setting out his plants he chooses two varieties known as the pistillate and the staminate. He sets about three rows of pistillates to one row of staminate, the latter being the fertilizing plant.

In caring for the plants he uses a cultivator freely, about the same as he would if he were caring for corn. He keeps this up until the frosts come in the fall and then leaves them until winter. He advocates putting a good coat of straw upon the plants to keep them from being killed out by the winter and spring ice. He does no more to the crop until the berries are ripe and then he engages his pickers, people that he can depend upon.—Green’s Fruit Grower.

Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: We received the pot-grown berry plants all right and are much pleased with them, indeed. We were at our office three days before we got them.

Truly yours,
Geo. M. Conklin.

Somora, O., Oct. 21, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: I received the berry plants some time ago. They were in good shape and as ordered. I set them out the next day and they are growing nicely now.

Very truly,
L. R. Burwell.
Strawberries

BUBACH

Varieties marked (Per.) have perfect blossom and those marked (Imp.) have imperfect blossom.

Aroma. (Per.)—Among the best of the late ripening varieties. Berries are firm, solid and not easily bruised, and there is no other variety that will stand shipping long distances better than the Aroma. Much like the Gandy in size and time of ripening, but of much better quality. Color dark red all the way through.

Brandywine. (Per.)—Medium late. An old and very popular variety of general adaptability. The berries are very large, dark red to the center, firm and of good flavor. Plant of vigorous growth and very productive. This is one of the very best varieties.

Bubach. (Imp.)—Mid-season. An old reliable variety, too well known to need describing. Very large, very productive, and generally one of the best.

Chesapeake. (Per.)—Late. One of the very best late varieties. It is being extensively grown all over the United States and giving satisfaction everywhere. It ripens at about the same time as the Gandy, beginning three or four days earlier. As compared with the Gandy, it is larger, just as firm, of better quality and without the green tips. The berries are uniform in size and of extra fine flavor.

Climax. (Per.)—Early. A very large early berry and very productive. Has an extra good flavor and is especially noted for its beauty. It is a dark red, having a glossy surface, and always draws attention on the market so that it brings the highest prices. Has excellent shipping qualities.

Early Ozark. (Per.)—Early. A very thrifty grower, with large, dark green, leathery leaf. It is as early as Excelsior or the extremely early but small Michel’s
BRANDYWINE

Early, and almost as large as Gandy or any of the other fine late varieties. Berries are almost round and bright red in color. It is enormously prolific.

Excelsior. (Per.)—Early. A very early berry, noted for its productiveness and its ability to stand drought and heat. It is extensively grown for market purposes.

Fendall. (Imp.)—Mid-season to very late. This is a seedling of the Wm. Belt, one of the most popular berries grown. It surpasses the Wm. Belt in size, flavor, beauty and uniformity. It also gives a longer season of fruit and produces nearly double the quantity of quarts per acre. This is, indeed, claiming a great deal, yet not too much. It has yielded at the rate of nearly seventeen thousand quarts per acre. Berries are smooth, glossy, firm and exceedingly rich in flavor. Plant of strong growth, with great power to resist drought.

Gandy. (Per.)—Late. A very large variety and more extensively grown than any other variety. It has more than ordinary firmness and as a shipper has no superior. It is very large and bright red. Produces more berries the second year of fruiting than the first. Gandy berries during the summer of 1913 sold, all during their season in the New York City markets, at from 15c to 23c per quart.

Glen Mary. (Per.)—Mid-season to late. Both berry and plant are very large. The demand for this variety grows rapidly each year. It is a very heavy yielder of juicy, rich and highly flavored fruit. As a shipper it takes first rank, and for this reason it is extensively grown by professional berry growers who ship their fruit long distances. Another element of popularity is the fact that its roots are long and bring up moisture from great depths below the surface, thus making it an ideal variety for dry seasons and localities where the rainfall is limited.

Haverland. (Imp.)—Mid-season. This is an old and well known variety that has been tested for many years, and is just as popular to-day as it ever was. The plant is large, a strong grower, entirely free from rust and disease, and bears enormous crops of very large bright red berries.

Joe Johnson. (Per.)—A very large, thrifty and productive berry of recent introduction. Last year it was extensively grown in some sections, and is said to have brought very high prices because of its large size and good shipping qualities. It is medium late and of good quality.

Klondyke. (Per.)—Medium early. One of the most extensively grown early berries. Its large size and unusual firmness make it especially valuable for a market variety and it frequently brings the top price. It is a vigorous grower and produces a good crop. It is uniform in size from early in the season to the last picking, there being very few small berries. There are not many better or more profitable berries than the Klondyke.

Lady Thompson. (Per.)—Mid-season. Of medium large size, and deliciously rich in flavor. It is extensively grown throughout the South and is becoming very popular in the North also. It is very productive, a thrifty grower, and resists drought well.

Marshall. (Per.)—Mid-season. One of the most popular berries grown. Extremely
large and of exceptionally good flavor. Not as productive as some other varieties, but its very large size makes it a very profitable variety.

Michel’s Early. (Per.)—Very early. An old and popular berry, of medium size and good flavor. Its extreme earliness and good shipping qualities make it a valuable variety.

Missionary. (Per.)—Early. A very popular southern variety. Berries medium large, very firm and one of the best for long distance shipping.

New York. (Per.)—Mid-season. A very large variety, thrifty in growth and very productive. It is very rich in flavor, but not as firm as many others. Very profitable for nearby markets, because of its great size and excellent flavor.

Nick Ohmer. (Per.)—Late. One of the most popular varieties. Very large, firm, and attractive.

Norwood. (Per.)—One of the largest strawberries grown, and claimed by the originator to have produced four berries to the quart. It is a good shipper and has a long fruiting season. Berries are bright red and of good quality. It is, in general, one of the best varieties grown.

Parson’s Beauty. (Per.)—Mid-season. A medium large berry of especially good flavor and a heavy cropper. It is very popular and grows well in all kinds of soil and climate.

Sample. (Imp.)—Medium late. One of the most reliable and profitable commercial berries grown. It is credited with having produced 500 bushels to the acre, two years in succession. This variety grows vigorously on all kinds of soil, and produces a heavy yield of very large, firm, juicy, fine flavored berries. As a shipper it has few equals.

Senator Dunlap. (Per.)—Mid-season. One of the most extensively grown varieties in the country and raised in all parts of the same. It is especially noted for being a very heavy bearer, very vigorous in growth, long fruiting season, and for being able to resist drought. Firm and a good shipper. One of the most profitable.

Sharpless. (Per.)—Late. An old favorite, but still very popular. Very large and sweet, and especially valuable for the home garden.

Ryckman. (Per.)—Medium early. From every standpoint this is decidedly one of the most valuable strawberries grown,
both for home use and market. It is of the very largest size, immensely productive, and unexcelled in sweetness and flavor. Under ordinary farm cultivation fifteen Ryckman berries can often be found that will fill a quart basket. Such berries naturally bring the highest prices in the market, and wherever the Ryckman is grown the berries are in much demand among fruit dealers. It is grown extensively, and the demand for Ryckman plants is rapidly increasing, as its large size, fine quality, and great productiveness make it an unusually profitable berry. It is very vigorous in growth, even on poor soils, and is noted for bearing heavy crops continuously on the same ground for several years. Few, and invariably produces a large crop of large berries. It has a long fruiting season and the last berries are almost as large as the first. It is firm and a good shipper. It is being more extensively grown each year.

*Wilson.* (Per.)—An old variety that is again in much demand. Thirty years ago this berry was more extensively grown throughout the country than any other. Few varieties ever produced larger crops of good fruit. It is a medium large berry, extremely productive, has a strong strawberry flavor, and is one of the best berries ever grown for shipping to distant markets. For a profitable market berry it probably has few equals at the present time.
Fall-Bearing Strawberries

Lovers of strawberries are delighted to know that they can now have this favorite fruit five or six months in the year, instead of one, as in days gone by. Fall-bearing plants set in the spring will yield a good crop in the fall, again the next June, and still again the second fall, making three crops in two years instead of one. When the plants are set in the spring the blossoms should be kept off until the middle or last of July to allow the plants to become strong and well established. There will be ripe fruit in about four weeks from the time you stop cutting off the blossoms, and right along after that until the ground freezes up for winter.

Progressive. (Per.)—The best of all the fall-bearing varieties and better than most of the June-bearing varieties. It is a vigorous grower, and as a plant maker is almost equal to the Senator Dunlap. It is not uncommon to find clusters of berries on young plants even before they are rooted. From one hundred to one hundred and fifty blossoms, green berries and ripe berries are often found at time on a single plant. The Progressive is of medium size, highly colored and in flavor ranks with the best. If picked as soon as it is ripe it is a good shipper. The fall-bearing strawberry is no longer an experiment but a decided success.

Superb. (Per.)—Next to the Progressive this is the most valuable fall-bearing variety. Being very similar to the Progressive, it needs no further description.
St. Regis. (Red)—This is the famous ever-bearing raspberry. It has made good and is now one of the most valuable raspberries grown for commercial purposes. The St. Regis when planted in the spring will produce young canes in a few weeks which will bear a crop of fruit from midsummer till frost comes in the fall. It is the only variety known that will produce a crop of fruit the same year it is planted. The next summer the old canes begin to bear fruit in June, and for four weeks thereafter they produce a heavier crop than any other red variety. By the time the old canes have produced their crop, the young canes of the same year's growth begin to bear and produce fruit continuously till cold weather. Berries are bright crimson, of large size and surprising quality—rich, sugary and with full raspberry flavor. As a shipper it is unexcelled, being so firm and rich in sugar that it will stand shipping two hundred miles, arriving at market in first class condition and can readily be kept for several days after being picked. It is the earliest of all red raspberries. It is of ironclad hardiness and strong, stocky growth. It succeeds upon all soils, its foliage never suffers by sunburn or scald, and its growth of cane is not impaired by the heat and drought of summer.
Black Diamond. (Black)—A very large, early blackcap, firm and of high quality. Very hardy and said to be the sweetest of black raspberries.

Columbian. (Purple)—A very hardy variety of remarkable vigor and productivity. Propagates from tips the same as blackcaps. Fruit large, dark red, bordering on purple. Very juicy with a rich flavor of its own. It is said that an ex-minister in this state grew 17,000 quarts, in 1912, from two and one-half acres of Columbian.

Cumberland. (Black)—The most popular blackcap and the largest of the raspberry family. Mid-season.

Cuthbert. (Red)—One of the old standard reliable sorts, and the most extensively grown red variety. It is a strong grower, very productive, and bears very large, firm berries of a rich, sprightly flavor.

Golden Queen. (Yellow)—Similar to Cuthbert in every way except color, which is a clear, translucent amber.

Gregg. (Black)—An old reliable variety. The canes are strong and fruit attractive and of choice quality. The best late market variety.

Kansas. (Black)—One of the most popular blackcaps and much earlier than Gregg. Fruit very large, jet black, firm and of rich flavor. One of the best shippers.

King. (Red)—The leading red raspberry. It unites earliness, large size, bright color, firmness of flesh and good quality with productiveness, vigorous growth and hardiness of cane. A good shipper and stands pre-eminent for endurance of cold in winter and the heat and drought of summer.

Plum Farmer. (Black)—A very large and popular early blackcap.

Ideal Fruit Farm, Camp Chase, Ohio, Oct. 26, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: In answer to your favor of recent date, I wish to state that I received the strawberry plants and other stock ordered from you, in good condition, and wish to advise that everything is satisfactory.

Yours very truly,
John Miller.

36 Pearl St., Hartford, Conn., Oct. 20, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: I beg to inform you that the trees and bushes came this morning and have been planted. The stock looks fine and I see no reason why it should not do well. I thank you for the great interest you have shown in this matter.

Very respectfully,
W. W. Neiffert.
Blackberries

Blowers—The leading blackberry. A large, handsome berry of superb quality. A sturdy grower, absolutely hardy, and yields very heavily for a long season, beginning in mid-season. Its canes have endured a temperature of twenty degrees below zero unharmed and it has yielded at the rate of 280 bushels per acre.

Eldorado—Especially valuable for its fine quality and hardiness. Berries are of good size, glossy, jet black, sweet and melting.

Erie—One of the very largest and best blackberries.

Mersereau—Early to mid-season, very large and hardy. Berries jet black, luscious and firm.

Snyder—Berries of medium size, but borne in great abundance, literally covering the bush with sweet and juicy fruit. Early and very hardy.
Gooseberries

Downing—The standard market variety. A sure and heavy yielder. Berries large and pale green.
Houghton—Very prolific. Berries red, rather small, but sweet and good.

Currants

Black Champion—A heavy bearer, large and black.
Cherry—Large berries, bright crimson. Sharp acid flavor.
Fay's Prolific—Less acid than Cherry, and the leading red variety. Bunch and berry large, bright and sparkling.
Red Cross—Color red. Mid-season. The most popular currant. Large, good flavored and very productive.
White Grape—The best white currant. Bunch and berries both large. A beautiful translucent white, and of mild, superior quality.
Wilder—One of the strongest growers and most prolific. Bunch and berry large, bright, attractive red. Hangs on bushes in fine condition for a long time.

Dewberries

Lucretia—The standard dewberry. Earlier than blackberries and as large as the largest of them. The canes are hardy and exceedingly prolific, thriving everywhere. They are of slender, trailing habit, and entirely free from disease and insect attacks. The fruit is of excellent quality, large and handsome, jet black, rich and melting. Ships well and keeps well.

Grapes

Agawam—Deep red. Mid-season. Large, loose bunch, berries large, with rich aromatic flavor.
Concord—The most popular black variety. Large clusters and large berries. Delicious flavor. Succeeds everywhere. Mid-season.
Diamond (Moore's)—The most reliable white grape. Bunches and berries large, greenish white, juicy and of good quality. Ripens early.
Eaton—The largest black grape. Bunch and berry of great size. Early, very prolific and of good quality.

Moore's Early—A reliable, early black grape. Medium bunch, berry large and jet black. Two weeks earlier than Concord.
Niagara—A very popular large, white grape, thin-skinned, sweet and luscious. Mid-season.
Wilder—A superior black grape. Bunch large, berry large, black, tender, and of superior quality. Very prolific. One of the very best.
Worden—A black grape that resembles Concord, with larger bunch and berries, and ten days earlier.

---

Grayville, Ill., Oct. 9, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: Plants came through in fine shape. Every one doing nicely and am well pleased.
Yours truly,
Geo. Hall.

Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: Plants arrived in good shape and are planted.
Respectfully,
B. G. Tompkins.
Asparagus Plants

This is one of the most profitable crops grown, and is considered by far the choicest of all early spring vegetables. It is ready for market very early in the spring, and can be cut for several months if desired. A field well planted will last for a lifetime. It is in great demand in all markets, selling at very fancy prices, and the demand for it is growing faster than the supply. Asparagus growing is still in its infancy, as it is being planted only in a limited way and in but few localities. Its culture is very simple. For the home garden set the plants from one to two feet apart in rows three feet apart. For field culture set the plants two feet apart in rows four to six feet apart. Plant about five inches below the surface and cover with two inches of earth, filling in the balance to a level by degrees during the summer.

Barr's Mammoth—Very large and productive.
Conover's Colossal—An old variety, well known everywhere. It is of large size, rapid in growth and of good quality.
Giant Argenteuil—Finest and most profitable. Stalks of immense size, rich and tender. Earlier than the other varieties. Free from rust and blight.
Palmetto—This has long been the most popular kind and most extensively planted. It is much like Giant Argenteuil, but perhaps not quite so large; still it is very large.

Rhubarb Roots

Sometimes called Wine Plant or Pie Plant. Plant in rows four feet apart, with the plants three feet apart in the rows. Set so that the crowns are about one inch below the surface.

Myatt's Linnaeus—Most popular and the best for general use. Early, very large, productive, tender, and very delicately flavored. Requires less sugar than the other sorts.

Horseradish Roots

Of the easiest culture. Plant the roots in moist, rich soil, small end down, with the top an inch below the surface.

Common or English—The well known sort; the one in common use.

Bohemian or Maliner-Kren—Of very strong growth. Cuttings planted in April pro-

duce fine large roots for grating the first of October. It is as white as snow when dressed. Grows to great size if left in the ground until spring, and yields as much as four tons to the acre.

189 French St., Torrington, Conn., Aug. 23, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: The strawberry plants received this P. M. and are looking fine—"The Best Ever." I do not see why every plant won't live. They were shipped in good shape. Inclosed find money order for same. When is the best time to set raspberry and blackberry plants?
Yours respectfully,
A. A. Johnson.

Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: Plants arrived to-day in fine shape, and I am greatly pleased with them. Please do not send back the extra 25c I am sending you, as they are worth it. Thanking you for your square business methods, which should make you many friends, I beg to remain,
Yours very truly,
William H. Hummel.
Apples

SUMMER

Early Harvest—Medium to large, pale yellow, mild and excellent; very productive. August.

Red Astrachan—Large and handsome, crimson, rather acid. A good grower and very hardy. August.

Golden Sweet—Large, pale yellow, a good grower and very productive. August.

Yellow Transparent—Medium yellow, tender and juicy; early. August.

AUTUMN

Duchess of Oldenburg—Large, striped; tender, juicy, sub-acid; a good grower, regular and free bearer. September.

Gravenstein—Very large, striped, tender, rich and sub-acid. September and October.

Fall Pippin—Very large, yellow, tender and best quality. One of the best varieties for table or market. October.

Fameuse (Snow Apple)—Early, medium, deep crimson; flesh snowy white, tender, melting and delicious. November to January.

WINTER

Baldwin—Large, dark red, sub-acid, good flavor; very profitable. December to March.

Ben Davis—Large, deep red, very attractive; tender, mild and sub-acid; free grower, very prolific, good shipper and keeper. February to May.

Golden Russet—Medium, russet, crisp, juicy, mild and sub-acid; very good flavor; hardy and long keeper. November to April.

Hubbardston Nonsuch—Large, striped yellow and red; tender, juicy and fine; great bearer; one of the best. November to May.

King of Tompkins County—A handsome red apple of the largest size and best quality; good grower and bearer and sells for higher prices than most other apples. November to March.
McIntosh Red—Large and beautiful; deep crimson and of the highest quality; hardy and a good regular bearer. November to January.

Northern Spy—Large, striped red; quality excellent; free grower and productive. December to June.

Northwestern Greening—A hardy winter apple of very large size, much larger than R. I. Greening. Highly prized in localities where the ordinary Greening will not succeed. Green, excellent quality; flesh yellowish, fine grained, tender, juicy, sub-acid.

Rhode Island Greening—Large, green, tender, rich, sub-acid; productive and very popular. December to April.

Roxbury Russet—Medium to large, yellow russet; crisp and good; productive. January to June.

Spitzenburg—Large, deep red with gray spots and delicately coated with bloom; flesh yellow, crisp, rich and excellent. November to April.

Stayman’s Winesap—Superior to Winesap in every way. Fruit is crisp, juicy, sprightly and aromatic; very good flavor. Vigorous, hardy, and an early and reliable annual bearer. December to April.

Wealthy—Medium to large, dark red; sub-acid; a free grower, productive and extra hardy. November to January.

Yellow Belleflower—Large, golden color, often with red blush; tender, crisp, juicy, sub-acid and of excellent quality. October to February.

CRAB APPLES

Transcendent—A beautiful variety of the Siberian Crab; red and yellow; very handsome; a remarkable grower and bearer. September and October.

Hyslop—Large, deep crimson; tree vigorous and hardy; very popular. October to January.

Pears

SUMMER

Bartlett—Well known and very popular. Large, yellow, high flavored, juicy and rich; a vigorous grower and heavy bearer. August and September.

Clapp’s Favorite—Much like Bartlett, of which it is a seedling, but larger and a little earlier. August.

AUTUMN

Duchess d’Anjou—Very large, greenish yellow; juicy, rich and of fine flavor; very popular. October.

Beurre d’Anjou—Very large, greenish yellow, buttery and melting, with sprightly vinous flavor; very vigorous and productive. One of the best and most desirable. October and November.

Flemish Beauty—Large and beautiful yellow and russet; juicy, melting, sweet. A great bearer. September and October.

Kieffer—Large, rich golden with red cheek. Very vigorous, healthy and hardy; an early, regular and abundant bearer; best kind for canning; remarkable for its keeping and shipping qualities. October and November.

Seckel—Small, yellowish brown and of highest flavor and quality; tree a good grower and productive. September and October.

Worden-Seckel—A seedling of the Seckel, but several times as large and superior in beauty and keeping quality. Very sweet, juicy and fine-grained, and has the peculiarly pleasant aroma of the Seckel. October.

WINTER

Beurre Clairgeau—Very large, light yellow shaded with crimson and russet; an early and abundant bearer. January.

President Drouard—Large and handsome; melting, juicy, rich, with delicate perfume. February to March.
Peaches

Beer's Smock—Large, yellow, with red cheek; flesh yellow and of the best quality for the season; a regular and enormous bearer, making it very desirable for market purposes. September.

Carman—Of largest size, yellow and red, firm; strong grower and heavy bearer. August.

Champion—An early peach of ironclad hardiness. Remarkable for its size and quality; creamy white with red cheek, very handsome. Last of August.

Crawford's Early—Very large, yellow and red; best quality, very productive; popular. Early September.

Crawford's Late—Similar to Early Crawford, but later and not quite so productive. Late September.

Elberta—The most popular peach grown. It is hardy, a sure bearer and very productive. Fruit large, yellow with red cheek; flesh yellow, juicy and firm and of high quality. A generally successful market peach and valuable also for planting in the garden. Ripens soon after Early Crawford.

Niagara—In appearance just like Elberta and of same size. However, it is a much better peach in quality, much less subject to leaf curl and other disease, hardier and about a week earlier.

Salway—One of the best and most regular bearers. Very large, creamy yellow with creamy cheek. Flesh deep yellow, juicy, rich and sweet. Early October.

Yellow St. John—Very similar to Crawford's Early, but two weeks earlier.

Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: Received the strawberry plants today, in good condition. Thanking you for the way I received them, I am.
Very truly,
Fred. O. Rhyner.

Franklin, Me., May 25, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: Received your two dozen McIntosh Red Apple trees all in fine condition. Thanking you for past favors, I remain,
Yours very truly,
Francis L. Wilbur.
Plums

than Abundance and about two weeks later. Large, clear cherry red; flesh deep yellow, very sweet, and of a fine, aromatic flavor. One of the best and most popular. Late August.

October Purple—Fruit large, dark maroon; fine flavor. Tree good grower and hardy. Middle of September.

Red June—Medium to large, brilliant red, good quality. Vigorous spreading tree. Early August.

Wickson—Large, carmine, flesh sweet and delicious. One of the largest plums grown.

EUROPEAN VARIETIES

Bradshaw—Most productive plum grown. Very large, purple, juicy and vigorous. August.

Fellemburg (French or Italian Prune)—The finest quality prune; oval, purple, juicy and delicious. Parts from stone. Fine for drying. Very productive. Aug.

Imperial Gage—One of the best plums. Large, greenish, juicy and rich. Very productive. August.

Yellow Gage—Large, deep yellow, rich, sugary and melting. Tree vigorous and productive. Middle of August.

York State Prune—One of the largest, best in quality and most productive of all prunes. Large, dark blue, sweet and handsome; prolific and a regular bearer. Last of August.

JAPANESE VARIETIES

Abundance—The popular plum. Large and early, of a beautiful, bright cherry color. One of the finest and handsomest growers. Very hardy and an early and abundant bearer. Middle of August.

Burbank—A vigorous grower and an abundant and early bearer. A little larger

Mossly Hill House,
Walpole, Mass., Nov. 23, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: Permit me to thank you for your check which I am returning to you herewith, as I do not think you ought to bear the cost of express surcharges in this case. It is indeed refreshing to have dealings with any one who has such unusual ideas of fair dealing. My grievance is not against you, but against the express companies, who charge at both ends. I am inclosing the label showing that charges were prepaid and that 30¢ had to be collected at Walpole. You have already sent me goods for the 43¢ charges on the first consignment, and you cannot be expected to pay my expenses in getting the goods from Walpole here. That disposes of all but 30¢, and if you can get that back from the express company you may place it to my credit and allow me for it in future orders. I expect I shall want a few seeds in the spring, and after the generous way in which you have treated me, I shall certainly not look beyond you for what I require. Kind regards from

Yours faithfully,
J. W. Day.

Danbury, Conn., Sept. 8, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: The strawberry plants you sent me some days ago were received in good order. They were good strong plants and I am very sure will do well. Thank you for the Brandywine plants sent. Sincerely yours,
Mrs. Ella S. Buckley.

Lakeville, Conn., June 11, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: Received the plants in first class shape. Am well pleased with them. They are A1 plants. Thanking you for the same and your promptness in shipping, I am, Most sincerely,
Robert Bennett.

Ushers, N. Y., June 22, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: Pepper and cauliflower plants came Saturday. They were fine. If celery plants are the same I shall be well satisfied. Kindly hurry them along.

Very respectfully,
A. H. Colvin.
Cherries

The Heart and Bigarreau Cherries are sweet and of larger and more robust growth than Dukes and Morellos. The growth of Dukes and Morellos is slower but much hardier; fruit sour.

SWEET CHERRIES
(Hearts and Bigarreaus)

Bing—One of the most delicious sweet cherries grown. Large, dark brown or black, and of very fine quality. July.

Black Tartarian—Very large, juicy, rich and productive. One of the best. End of June.

Governor Wood—Large, light red; juicy, rich and delicious. End of June.

Schmidt—Very large, jet black, juicy, sweet and of fine flavor. Hardy and a good shipper. July.

Yellow Spanish—Large, pale yellow with red cheek; juicy and very good. One of the best. Last of June.

SOUR CHERRIES
(Dukes and Morellos)

Baldwin—Largest, richest and least sour of the Morello type; upright grower and very productive. End of July.

Early Richmond—Most popular sour cherry. Medium, red, quite acid; hardy, healthy, very early and productive. June.

English Morello—The most valuable late cherry. Easily grown, producing a heavy crop every year. Large, very dark red, sub-acid, rich and good; very hardy for extremely cold latitudes. End of July.

Montmorency—One of the most popular of all hardy cherries for market and home use. Is planted largely in all parts of the country. Sells at fancy prices. Large, light red, tender and sub-acid. End of June.

Apricots

Alexis—Large, yellow, red blush, sub-acid, rich and good quality. Middle of July.

Early Moorpark—One of the largest and finest apricots. Orange with red cheek, rich flavor and very productive. July.

Harris—Medium, hardy, productive, bright yellow with red cheek, juicy and good. Begins to bear when young. Middle of July.

Quinces

Champion—Larger than Orange; equally as good; more vigorous and productive, but later. November 1st.

Orange—Sometimes called the Apple Quince. Large, bright golden yellow. When cooked it is tender, juicy and of excellent flavor. This is the variety most extensively cultivated. October.

Rea's Mammoth—A seedling of the Orange, but averages double its size, equally as good and ripens a week earlier. Very productive and bears young. Last of September.
Price List

At the prepaid prices given, stock will be shipped prepaid to any part of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, New Jersey, Ohio, Maryland, Delaware, Virginia and West Virginia. On most kinds of stock I have quoted a price for which small lots will be sent by mail to any part of the United States. For quantities that can be shipped by mail, see note on "Prepaid Prices" in the first part of catalog.

STRAWBERRIES FOR SPRING PLANTING

Varieties marked (Per.) have perfect blossoms and those marked (Imp.) have imperfect blossoms. When planting varieties having imperfect blossoms, every fourth row should be planted with a perfect flowering variety.

SHIPPING POINTS. Strawberry plants will be shipped mostly from Good Ground, N. Y., and Cutchogue, N. Y. Some will be shipped from other points in this State and from growing stations in Maryland and Delaware.

36 Pearl St., Hartford, Conn., Oct. 8, 1914, Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: The rose bushes and violets came to-day and look good. We have planted them and believe they are splendid stock and all that you promised. I appreciate your efforts. When may we expect the small fruit plants and fruit trees?

Very truly yours,
W. W. Neiffert.

456 Genesee St., Utica, N. Y., Nov. 3, 1914, Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: Strawberry plants received, and am very much pleased with same as to size, also count. You will doubtless hear from me again in the future. Inclosed find money order to amount of $5.25 for same. Please send me your catalogues as issued.

Very truly yours,
Edwin T. Stoetzner.

Marlboro, N. Y., Jan 12, 1915,
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: I received the strawberry plants O. K. I want to say right now that they are the finest plants I ever saw shipped out. I did not lose over fifteen out of the 1500 I bought. I shall take pleasure in doing business with you in the future, and shall advise my friends to order from you when they want something good. I will send you a list of names if you wish them.

Yours,
W. I. Mackey.

Lowell, Mass., Dec. 3, 1914,
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: The strawberry plants you sent me from Maryland were very good. Seem to be full of vitality. Send me catalogue as soon as possible. Also send seed list.

Yours truly,
G. D. Goss.
POT-GROWN STRAWBERRY PLANTS
For Summer and Fall Planting

First class pot-grown strawberry plants that will produce a full crop of fruit next summer. These plants have a large mass of roots and are shipped with the earth on them, just as they grow in the pots. They will reach you in a growing condition and can be safely transplanted at any time, even in very dry weather. They will be shipped by express as they cannot be safely shipped by mail. They will be ready for shipment the last of July or first of August.

SHIPPING POINTS. Pot-grown strawberry plants will be shipped mostly from Good Ground, N. Y. and Cutchogue, N. Y. Some will be shipped from other points in this State and from a growing station in New Jersey.

SEEDS

At the prices named in this list, seeds by the ounce, quarter pound, pound, pint and quart will be shipped by mail postpaid to any part of the United States. By the peck and bushel seeds will be shipped not prepaid. Half pounds may be ordered at pound rate, half pecks at peck rate, and half bushels at bushel rate. Ask for special prices on large lots.

SHIPPING POINTS. Seeds will be shipped mostly from Philadelphia, Pa.

ASPARAGUS

GIANT ARGENTEUIL. A French variety that produces an abundance of heavy, dark green shoots. Very early. Oz. 10c, ¼ lb. 20c, lb. 60c.

PALMETTO. The most popular variety. Early, large, green and very productive. Oz. 10c, ¼ lb. 20c, lb. 70c.

BEANS

Wax Potted Bush

WARDWELL’S KIDNEY WAX. Long, handsome, yellow, flat pods of fine quality. Qt. 50c, pk. $2.70, bush. $10.50.

CURRIE’S RUST PROOF. Hardy, early and prolific. Long, flat, yellow pods. Qt. 50c, pk. $2.60, bush. $10.00.

RUST PROOF GOLDEN WAX. Early and prolific; pods flat. Qt. 50c, pk. $2.25, bush. $8.75.

BURPEE’S NEW KIDNEY WAX. Stronger grown and more prolific than Wardwell's. Pods fleshy, thick and entirely stringless. Qt. 50c, pk. $2.25, bush. $8.75.

BURPEE’S STRINGLESS GREEN POD. An extra early round podded sort, very prolific, with stringless pods of excellent quality. Qt. 50c, pk. $2.25, bush. $8.50.

REFUGE WAX. Similar to Refugee or Thousand to One except they are yellow. Qt. 50c, pk. $2.25, bush. $8.75.

BEANS

Green Potted Bush

BURPEE’S STRINGLESS GREEN POD. An extra early round podded sort, very prolific, with stringless pods of excellent quality. Qt. 50c, pk. $2.25, bush. $8.50.

EXTRA EARLY RED VALENTINE. One of the most popular. Pods of medium length and very prolific. Qt. 50c, pk. $2.25, bush. $8.50.

REFUGE OR THOUSAND TO ONE. Usually sown for fall crop. Pods are of medium length and round. Very prolific. Because of the dense foliage, it will stand a light frost without injury to the pods. Qt. 50c, pk. $2.25, bush. $8.50.

BOUNTIFUL. Extra early; stringless flat pods of excellent quality. Very prolific. Qt. 50c, pk. $2.25, bush. $8.50.

BEANS

Pole Varieties

KENTUCKY WONDER or OLD HOMESTEAD. Early, very prolific and an excellent snap bean. Pods green and seven or eight inches long. Qt. 50c, pk. $2.00, bush. $7.50.

EARLY GOLDEN CLUSTER WAX. One of the best wax podded pole beans. Pods six to eight inches long, broad, thick and of the very best quality. Long season. Qt. 50c, pk. $2.00, bush. $8.25.

KENTUCKY WONDER WAX. One of the very best pole beans. Pods long, thick, stringless and bright yellow. Seed brown. Qt. 50c, pk. $2.25, bush. $8.00.

BEANS

White Shelling Varieties

LARGE WHITE MARROW. The standard shell bean. Qt. 40c, pk. $1.60, bush. $6.00.

LIMA BEANS

Bush Varieties

BURPEE’S BUSH LIMA. Large and very productive. Qt. 50c, pk. $2.40, bush. $8.75.

BURPEE’S IMPROVED BUSH LIMA. Larger pod, thicker beans and a few days earlier than Burpee’s Bush Lima. Qt. 50c, pk. $2.75, bush. $10.50.

FORDHOOK BUSH LIMA. Both pod and beans are twice the size of Burpee’s Bush Lima. Very prolific. Qt. 50c, pk. $3.75, bush. $12.00.

DEERE'S BUSH LIMA. Large, productive and very popular. Qt. 60c, pk. $3.75, bush. $12.00.

LIMA BEANS

Pole Varieties

CHALLENGER or DEERE’S IMPROVED. Early and bears till frost. Very productive. Pods thicker than other Limas, with an average of four thick beans in each. Qt. 50c, pk. $2.25, bush. $7.50.

SEIBERT'S LARGE EARLY. Considered the best pole Lima. Extra early, very productive and bears till frost. Pods average four large green beans of the finest quality. Qt. 50c, pk. $2.00, bush. $5.60.

BEET

CROSEY’S EGYPTIAN. One of the most popular. It is early, matures quickly. Smooth and dark colored. Oz. 12c, ¼ lb. 35c, lb. $1.25.

CRIMSON GLOBE. Second early: deep crimson. The flesh is tender and of fine quality. Oz. 12c, ¼ lb. 35c, lb. $1.15.
EARLY ECLIPSE. Very early, globular, bright red and of excellent quality. Oz. 12c, ¼ lb. 30c, lb. $1.00.

DETROIT DARK RED. Very popular main crop sort. Round, smooth, dark blood-red. Quality fine. Oz. 12c, ¼ lb. 30c, lb. $1.15.

LONG DARK RED. A standard late variety, keeping well through the winter. Root long, smooth, very dark. Flesh dark red, sweet and tender. Oz. 12c, ¼ lb. 30c, lb. $1.00.

SWISS CHARD
LUCELUS. Large, crumpled leaves. Best variety. Oz. 12c, ¼ lb. 30c, lb. $1.00.

MANGEL WURZEL
MAMMOTH LONG RED. Standard red variety. Very large. Oz. 7c, lb. 45c.
GOLDEN TANKARD. Large, yellow. Oz. 7c, lb. 45c.

BRUSSELS SPROUTS
LONG ISLAND IMPROVED. The best variety. Oz. 25c, ¼ lb. 75c, lb. $2.50.

CABBAGE
EXTRA EARLY EXPRESS. Earliest of all. Will produce heads in 80 days. Oz. 25c, ¼ lb. 75c, lb. $2.50.
EARLY JERSEY WAKEFIELD. Most popular pointed head cabbage. Heads of medium size, solid and of excellent quality. Very early. Oz. 25c, ¼ lb. 75c, lb. $2.50.
CHARLESTON or LARGE WAKEFIELD. From five days to a week later than Early Jersey Wakefield, and larger. Oz. 25c, ¼ lb. 75c, lb. $2.50.
ENKHUIZEN GLORY. An „excellent round headed sort, maturing with the Large Wakefield. Oz. 25c, ¼ lb. 75c, lb. $2.50.
EARLY SUMMER. Early, large, round. Oz. 25c, ¼ lb. 75c, lb. $2.50.
COPENHAGEN MARKET. The earliest large round-headed cabbage grown. Heads average about eight pounds each, solid and as early as Early Jersey Wakefield. Oz. 30c, ¼ lb. $1.00, lb. $3.50.
ALL HEAD EARLY. Heads large, flat, solid and slightly rounded. Quality excellent. Oz. 25c, ¼ lb. 75c, lb. $2.50.

CABBAGE
SUCCESION. A popular second early sort. Heads large, flat and solid. Remains in good condition for a long time. Oz. 25c, ¼ lb. 75c, lb. $2.50.
EARLY WINNINGSTADT. Popular sort for the garden, as the heads remain in good condition for a long time. Heads pointed, medium size and hard. Oz. 25c, ¼ lb. 75c, lb. $2.50.
PERFECTION HARD HEADING SAVOY. The best large Savoy. Large, solid, almost round, with leaves densely crumpled. Oz. 25c, ¼ lb. 75c, lb. $2.50.
PERFECTION LATE FLAT DUTCH. Very popular. Heads large, oval, solid and of splendid quality. Oz. 25c, ¼ lb. 75c, lb. $2.50.
PREMIUM LATE DRUMHEAD. Large solid heads. Oz. 25c, ¼ lb. 75c, lb. $2.50.
DANISH BALL HEAD. Most popular late cabbage. Medium size, very solid and keeps in good condition for a long time. Oz. 25c, ¼ lb. 75c, lb. $2.50.
MAMMOTH RED ROCK. One of the best red varieties. Large, round, solid heads. Oz. 25c, ¼ lb. 75c, lb. $2.50.

CARROT
DANVERS HALF LONG. One of the best, and most popular. Oz. 10c, ¼ lb. 35c, lb. $1.10.
SAINT VALERY. Long, deep orange color. Oz. 10c, ¼ lb. 30c, lb. $1.00.
RUBICON HALF LONG. Half long, stump rooted, smooth. Grows quickly and is one of the best for forcing. Oz. 15c, ¼ lb. 40c, lb. $1.25.
IMPROVED LONG ORANGE. Large and round. Oz. 10c, ¼ lb. 30c, lb. $1.00.
CHANTENAY or MODEL. Oz. 10c, ¼ lb. 35c, lb. $1.10.

CAULIFLOWER
EARLY SNOWBALL. One of the most popular, with beautiful shapely heads from 10 to 12 inches in diameter. ¼ oz. 75c, oz. $2.50, ¼ lb. $8.00, lb. $28.00.
EXTRA EARLY DWARF ERFURT. One of the best for forcing or for an outdoor crop. Heads large and compact. ¼ oz. 75c, oz. $2.50, ¼ lb. $8.00, lb. $28.00.
VEITCH'S AUTUMN GIANT. A very large late sort. ½ oz. 20c, oz. 60c, ¼ lb. $1.60, lb. $5.00.

CELERY
GOLDEN SELF BLANCHING. The most popular and best of the early varieties. Pkt. 15c, oz. $1.50, ¼ lb. $5.00, lb. $20.00.
PERFECTION WHITE PLUME. The earliest celery. Oz. 25c, ¼ lb. 85c, lb. $3.00.
WINTER QUEEN. A popular, late-keeping, green sort. Very stout, medium height and full hearted. Oz. 25c, ¼ lb. 75c, lb. $2.50.
GIANT PASCAL. One of the best in quality. Plant vigorous and stout. A good late keeper. Oz. 25c, ¼ lb. 75c, lb. $2.50.
DWARF GOLDEN HEART. A dwarf, stocky sort, with a full yellow heart. Quality excellent and a good keeper. Oz. 25c, ¼ lb. 75c, lb. $2.50.

CORN
Table Varieties
SIMON'S EARLY WONDER. Very early and one of the best. Three to five days earlier than White Cor. With a larger and better shaped ear. In quality it is better than any of the early varieties. Ears average 8 inches long, with 10 or 12 rows. Pt. 25c, qt. 45c, pk. $1.50, bush. $5.75.
ADAMS' EXTRA EARLY. A very early white corn. Can be planted very early. Pt. 25c, qt. 40c, pk. $1.10, bush. $3.60.
MAMMOTH WHITE CORY. One of the earliest sugar corns. Pt. 25c, qt. 40c, pk. $1.50, bush. $4.25.

EARLY METROPOLITAN. Extra early. Ear medium size. Good quality. Pt. 25c, qt. 40c, pk. $1.50, bush. $5.00.

PEEP O’DAY. One of the very earliest. Medium sized. Quality fine. Pt. 25c, qt. 40c, pk. $1.50, bush. $4.50.

GOLDEN BANTAM. Very early and of excellent quality. Ear small and grain yellow. Pt. 25c, qt. 45c, pk. $1.75, bush. $5.50.

HOWLING MOB. One of the best. Usually produces two good ears to the stalk. Ears 7 to 9 inches in length, with 12 to 14 rows of grain. Four to six days later than White Cory. Pt. 25c, qt. 45c, pk. $1.75, bush. $4.50.

LONG ISLAND BEAUTY. Ears large, grain deep and of the finest quality. One of the best late sorts. Pt. 25c, qt. 45c, pk. $1.75, bush. $5.00.

STOWELL’S EVERGREEN. The standard main crop variety. Ears large, grain very deep and tender, remaining in eatable condition for a long time. Pt. 25c, qt. 40c, pk. $1.25, bush. $4.00.

COUNTRY GENTLEMAN. Ear medium sized, cob small, densely covered with irregular rows of very long slender white grains of the very finest quality. Pt. 25c, qt. 40c, pk. $1.50, bush. $4.50.

CORN

Field Varieties

IMPROVED LEAMING. Very popular. Yellow. Qt. 30c, pk. 70c, bush. $2.15.

GOLDEN BEAUTY. Yellow. Qt. 30c, pk. 70c, bush. $2.15.

REID’S YELLOW DENT. Yellow. Qt. 30c, pk. 70c, bush. $2.15.

CUCUMBER

JERSEY PRIDE. Best all-round variety. As early as any of the White Spine strains and out-yields them all. Dark glossy green, uniform in shape, average length 8 to 10 inches. Hold their color and brittleness long after being cut. Oz. 15c, ¼ lb. 30c, lb. $1.00.

MATCHLESS WHITE SPINE. Extra long, dark green, of handsome shape and appearance. A little later than Arlington. Oz. 15c, ¼ lb. 30c, lb. $1.10.

ARLINGTON WHITE SPINE. One of the most popular. Extra early, very prolific and averages 10 to 12 inches. Oz. 10c, ¼ lb. 25c, lb. $1.00.

EARLY FORTUNE. Early, dark color, prolific, averaging about 10 inches. Oz. 15c, ¼ lb. 30c, lb. $1.00.

BOSTON PICKLING. Very productive and extensively grown for pickling. Medium size, smooth and bright green. Oz. 10c, ¼ lb. 25c, lb. $1.00.

COOL AND CRISP. An extra early, prolific, dark green cucumber, with fruits of good length and fine quality. Oz. 15c, ¼ lb. 30c, lb. $1.10.

LONDON or IMPROVED DARK GREEN. Second early, long dark green; firm and crisp. Oz. 12c, ¼ lb. 30c, lb. $1.10.

ENDIVE

NEW YORK LARGE GREEN CURLED. Large, green curled, hardy. One of the best winter varieties. Oz. 15c, ¼ lb. 45c, lb. $1.40.

BROAD LEAVED BATAVIAN. Best broad-leaved variety. Oz. 10c, ¼ lb. 40c, lb. $1.25.

EGG PLANT

BLACK BEAUTY. Best variety. Early, productive, thornless. Fruits large, glossy black. Oz. 45c, ¼ lb. $1.25, lb. $4.50.

NEW YORK IMPROVED LARGE PURPLE. Fruits large, dark purple; very productive and spine-less. Oz. 45c, ¼ lb. $1.10, lb. $4.00.

KALE

LONG STANDING CURLED SIBERIAN. Large green leaves, plain in center but heavily curled on the edge. A fast grower and very hardy. Oz. 10c, ¼ lb. 25c, lb. 75c.

KOHL RABI

SHORT LEAVED EARLY WHITE VIENNA. Best variety for forcing or outdoor crop. Very early, tops small. Oz. 25c, ¼ lb. 65c, lb. $2.15.

EARLY PURPLE VIENNA. Very early, top small, skin purple. Oz. 30c, ¼ lb. 85c, lb. $2.50.

LETTUCE

ALL SEASONS. Good variety to plant throughout the season. Oz. 15c, ¼ lb. 45c, lb. $1.25.

BOSTON MARKET or WHITE SEEDED TENNIS BALL. Small, compact heading sort, used for forcing. Oz. 15c, ¼ lb. 40c, lb. $1.25.

BLACK SEEDED TENNIS BALL. Oz. 15c, ¼ lb. 40c, lb. $1.25.

BIG BOSTON. One of the most popular. Large and solid. Oz. 15c, ¼ lb. 50c, lb. $1.60.

BLACK SEEDED SIMPSON. One of the best loose-leaved curled sorts. Very tender and remains in good condition for a long time. Oz. 15c, ¼ lb. 40c, lb. $1.25.

GRAND RAPIDS. Best loose-leaved variety for forcing. Rapid grower. Oz. 15c, ¼ lb. 50c, lb. $1.65.

IMPROVED SALAMANDER. One of the most popular and best all-season heading sorts. Medium large and quite firm. Oz. 15c, ¼ lb. 40c, lb. $1.25.

MUSK MELOH

ROCKY FORD or NETTED GEM. Oval, slightly ribbed, densely netted, medium size. Flesh green, thick and of fine quality. Oz. 10c, ¼ lb. 30c, lb. 90c.

LARGE JENNY LIND. Green shaded, medium to large, somewhat flattened, deeply ribbed, heavily netted. Early and of excellent quality. Oz. 10c, ¼ lb. 30c, lb. 90c.
LONG ISLAND BEAUTY. Flesh green, fine quality. Large, well flattened and heavily netted. Early. Oz. 12c, ¼ lb. 30c, lb. 90c.

HACKENSACK or TURK'S CAP. Green fleshed, very large, nearly round, heavily netted, very sweet and finely flavored. Oz. 12c, ¼ lb. 30c, lb. 90c.

EMERALD GEM. Salmon fleshed. One of the most popular. Small, deep green, almost smooth. Flesh thick and exceedingly high-flavored. Oz. 15c, ¼ lb. 30c, lb. $1.00.

OSAGE or MILLER'S CREAM. Salmon fleshed. Medium to large, slightly ribbed, dark green and almost smooth. Flesh thick and of the finest quality. Oz. 15c, ¼ lb. 30c, lb. $1.00.

BURRELL GEM or DEFENDER. Salmon fleshed. Medium size, oval, slightly ribbed, well netted. Flesh thick and exceptionally high-flavored. Oz. 12c, ¼ lb. 30c, lb. 90c.

WATER MELON

BLACK BOULDER or BLACK DIAMOND. A mammoth oval dark green melon. Has produced melons weighing from 75 to 80 pounds. Flesh bright red and firm. An excellent shipper. Oz. 10c, ¼ lb. 25c, lb. 75c.

BRANCH'S IMPROVED GEORGIA RATTLESNAKE. Best strain of Rattlesnake. Sweet and fine flavored. Oz. 10c, ¼ lb. 25c, lb. 75c.

COLE'S EARLY. One of the earliest. Small, striped, very prolific; good flavor. Oz. 10c, ¼ lb. 25c, lb. 75c.

FORDHOOK EARLY. The earliest large fruited melon. Good quality. Round, dark green with an occasional stripe. Skin tough, making it a good shipper. Oz. 10c, ¼ lb. 25c, lb. 75c.

HALBERT'S HONEY. Much like Kieckley's Sweet, of as good quality and darker. Oz. 10c, ¼ lb. 25c, lb. 75c.

KIECKLEY'S SWEET. One of the best and most popular. Medium size, oblong, skin dark green. Flesh bright scarlet with solid heart, crisp, sugary and melting and entirely free from stringiness. Oz. 10c, ¼ lb. 25c, lb. 75c.

MAMMOTH IRONCLAD. Very large, oblong, striped and mottled. Rind tough, making it a good shipper. Oz. 10c, ¼ lb. 25c, lb. 75c.

SWEET HEART. Oval, pale green, slightly striped. Flesh deep red and of the finest quality. Oz. 10c, ¼ lb. 25c, lb. 75c.

MUSTARD

SOUTHERN GIANT CURLLED. Leaves light green, frilled and much crimped at the edge. Oz. 7c, ¼ lb. 20c, lb. 50c.

ONION

LARGE RED WETHERSFIELD. Larger, flattened, yet quite thick; deep purplish red. Good keeper. Oz. 15c, ¼ lb. 40c, lb. $1.25.

SOUTHPORR RED GLOBE. Large, globe-shaped, deep red. Oz. 18c, ¼ lb. 40c, lb. $1.25.

SOUTHPORR YELLOW GLOBE. Large, globe-shaped, rich yellow. Oz. 18c, ¼ lb. 40c, lb. $1.25.

SOUTHPORR WHITE GLOBE. Large, globe-shaped, pearly white. One of the best. Oz. 20c, ¼ lb. 55c, lb. $1.95.

PRIZETAKER. Very large, handsome, nearly globular, skin yellow, flesh white and very mild. Oz. 20c, ¼ lb. 50c, lb. $1.50.

OHIO YELLOW GLOBE. One of the very best. Bright yellow. Ripens early and keeps well. Oz. 15c, ¼ lb. 40c, lb. $1.25.

YELLOW GLOBE DANYERS. Nearly globe-shaped, yellow skin. Good keeper. Oz. 15c, ¼ lb. 40c, lb. $1.25.

PARSLEY

EXTRA DOUBLE CURLLED. Leaves well curled, dark green and compact. Oz. 10c, ¼ lb. 25c, lb. 70c.

SUMMER GREEN. Half-curled, dark green, of rapid growth; does not turn yellow, and is the best summer variety. Oz. 12c, ¼ lb. 35c, lb. $1.10.

PARSNIP

PERFECTION HOLLOW CROWN. Handsomest variety. Roots half long, thick through, smooth and white. Oz. 10c, ¼ lb. 25c, lb. 70c.

LONG SMOOTH HOLLOW CROWN. Larger than Perfection but not as thick through. Oz. 10c, ¼ lb. 25c, lb. 70c.

PEAS

ALASKA or EARLIEST OF ALL. A very popular variety. Earliest sort to mature. Pods short; very prolific. Qt. 45c, pk. $1.60, bush. $5.75.

GRAND MONARCH. Best extra early pea for market gardeners. Height 3 feet; very prolific. Pods large. Qt. 45c, pk. $1.85, bush. $7.50.

GRADUS or PROSPEROUS. Most popular large podded wrinkled sort. Matues just after the extra early varieties, producing a good crop of four-inch pods. Height, 3 feet. Quality fine. Qt. 45c, pk. $2.00, bush. $8.00.

LAKTIONIAN. Finest dwarf early pea. Vines 18 to 20 inches high, producing an enormous crop of dark green pods as large as Gradus and a few days earlier. Qt. 50c, pk. $2.25, bush. $9.50.

NOTT'S EXCELSIOR. Medium early. Height 14 inches; very prolific and quality best of any. Qt. 45c, pk. $1.80, bush. $8.50.
THOMAS LAXTON. Much like Gradus, but yields more and is about as early. Qt. 45c, pk. $2.00, bush. $7.25.

CHAMPION OF ENGLAND. Very popular variety. Vine from 4 to 5 feet, producing a large crop of three-inch pods filled with very large, sweet, tender peas. Qt. 45c, pk. $1.80, bush. $6.25.

TELEPHONE. An old, popular variety. Pods very large, filled with large peas of the very best quality. Three and a half feet. Qt. 45c, pk. $1.80, bush. $6.50.

YANKY PRINCE. The best large podded wrinkled sort of the Telephone type. Remarkably healthy, vigorous and productive. Pods of the largest size, frequently 6 inches in length. Peas of the richest flavor. Height 4 feet. Qt. 50c, pk. $2.25, bush. $7.75.

PEPPER

Sometimes Called Sweet Mountain

BULL NOSE or LARGE BELL. Very productive. Fruit large, with thick flesh, usually quite hot. Oz. 25c, ½ lb. 75c, lb. $2.50.

NEAPOLITAN EARLY. Earliest large sort. Medium size, very prolific and quite early. Oz. 25c, ½ lb. 75c, lb. $2.50.

CHINESE GIANT. One dwarf, fruit of mammoth size. Late. Mild and of fine flavor. Oz. 25c, ½ lb. $1.125, lb. $3.75.

RUBY KING. A large, mild sort with fruit often 6 inches long. Oz. 30c, ¼ lb. 90c, lb. $3.25.

LONG RED CAYENNE. Long, hot variety. Oz. 25c, ¼ lb. 80c, lb. $2.75.

PUMPKIN

NEW ENGLAND PIE or SUGAR. Small, round, yellow, with flesh yellow, rich, sweet and fine grained. Oz. 10c, ¼ lb. 25c, lb. 65c.

MAMMOTH GOLDEN CUSHAW. One of the best stock-feeding varieties. Solid, yellow, crook necked, nearly all flesh. Oz. 10c, ¼ lb. 25c, lb. 85c.

GOLDEN OCELOG. Oblong, averaging about 20 by 10 inches. Skin golden yellow and tough. Good keeper and of fine quality. Oz. 10c, ¼ lb. 25c, lb. 70c.

LARGE CHEESE or KENTUCKY FIELD. Skin cream color, fruit flattened, very large, flesh yellow and of excellent quality. Oz. 10c, ¼ lb. 25c, lb. 60c.

KING OF THE MAMMOTH or JUMBO. Largest of all pumpkins; orange-colored, with flesh deep bright yellow and of excellent quality. Oz. 15c, ¼ lb. 35c, lb. $1.25.

RADISH

PHILADELPHIA WHITE BOX. Very popular. Early, round, white. Oz. 10c, ¼ lb. 25c, lb. $1.00.

CRIMSON GIANT. Large, early, round, of the Scarlet Globe type. Bright red. Oz. 10c, ¼ lb. 25c, lb. 75c.

EARLY SCARLET GLOBE. Round, bright red. Oz. 10c, ¼ lb. 25c, lb. 70c.

EARLY SCARLET TURNIP, WHITE TIPPED. One of the most popular. Slightly flattened. Red and lower part white. Oz. 10c, ¼ lb. 20c, lb. 60c.

WHITE ICICLE. One of the best early long white sorts. White, crisp and tender. Oz. 10c, ¼ lb. 25c, lb. 75c.

WHITE STRASBURG. One of the most popular summer sorts. Long, thick, white. Remains solid for a long time. Oz. 10c, ¼ lb. 25c, lb. 70c.

FRENCH BREAKFAST. Similar to Scarlet Turnip. White tipped, but oblong in shape. Oz. 10c, ¼ lb. 25c, lb. 75c.

HALF LONG THICK SCARLET. Roots half long, deep scarlet color. Oz. 10c, ¼ lb. 25c, lb. 70c.

LONG RED CHARTIER. Very long, scarlet rose in color, shading to white at the tip. Remains in condition for use for a long time. Oz. 10c, ¼ lb. 25c, lb. 70c.

CHINA ROSE or SCARLET CHINA. One of the best of the most popular and winter sorts. Roots 6 inches long, of bright rose color. Firm and crisp. Oz. 10c, ¼ lb. 25c, lb. 70c.

SPINACH

EARLY GIANT THICK LEAF. Quickest growing sort. Leaves large, round and almost smooth. Oz. 8c, ¼ lb. 15c, lb. 30c.

MAMMOTH ITALIAN LONG STANDING. Largest growing variety. Leaves very broad and of mammoth size. Dark green, slightly crumpled. Oz. 8c, ¼ lb. 15c, lb. 35c.

NEW ZEALAND. Different from true spinach in that it thrives during hot weather in any soil. Plant large, shoots tender and of good quality and may be cut throughout the summer. Oz. 8c, ¼ lb. 20c, lb. 75c.

SQUASH

EXTRA EARLY WHITE BUSH SCALLOPED. Popular variety of bush growth. Color greenish-white changing to creamy white. Excellent quality. Oz. 10c, ¼ lb. 25c, lb. 75c.

EARLY YELLOW BUSH SCALLOP. Similar to the above, but has yellow skin.

GIANT YELLOW SUMMER CROOKNECK. Large, deep yellow, with a warty surface. Oz. 12c, ¼ lb. 30c, lb. 90c.

DELICIOUS. A very early winter variety of medium size. Flesh thick, fine grained, yellow and of excellent quality. Oz. 12c, ¼ lb. 30c, lb. 90c.

GOLDEN HUBBARD. Similar to Hubbard, except that it is smaller, and is of an orange red color. Oz. 12c, ¼ lb. 35c, lb. $1.00.

TRUE HUBBARD. One of the best winter squashes. Flesh bright orange yellow, fine grained, very dry, sweet and richly flavored. Fruit large, oval with skin green, rough and covered with warts. Excellent keeper. Oz. 12c, ¼ lb. 30c, lb. $1.00.

FORDHOOK. Oblong with cream colored skin. Flesh light colored skin, thick and of excellent quality. Good keeper. Oz. 15c, ¼ lb. 35c, lb. $1.10.

MAMMOTH CHILLI. Very large size, with flesh thick rich yellow, fine grained and sweet. Oz. 15c, ¼ lb. 50c, lb. $1.25.
HARRY L. SQUIRES

TOMATO

ACME. Very popular. Medium size, purple. Oz. 25c, ¼ lb. 70c, lb. $2.25.

BONNY BEST. One of the best. Early, medium size, bright scarlet, smooth, very prolific. Oz. 30c, ¼ lb. $1.00, lb. $3.00.

CHALK'S EARLY JEWEL. One of the best medium early. Bright scarlet, smooth, solid. Oz. 30c, ¼ lb. 90c, lb. $2.90.

DWARF STONE. Largest dwarf variety. Fruit of good color, smooth and solid. Oz. 25c, ¼ lb. 80c, lb. $2.50.

EARLIANA (Spark's). The earliest smooth good sized tomato. Very productive. Oz. 30c, ¼ lb. 90c, lb. $2.75.

GOLDEN QUEEN. Large, smooth, yellow and very sweet. Oz. 30c, ¼ lb. 90c, lb. $2.75.

GLOBE (Livingston's). A large, purple-fruitied sort of excellent quality. Oz. 30c, ¼ lb. 90c, lb. $2.50.

JUNE PINK. Similar to Spark's Earliana, except that the fruit is purple instead of scarlet, and a little later. One of the best extra early sorts. Oz. 30c, ¼ lb. 90c, lb. $2.75.

MATCHLESS. One of the best main crop sorts. Large, smooth, solid, of a good red color, quite prolific, and matures a little later than Stone. Oz. 25c, ¼ lb. 90c, lb. $2.50.

PARAGON. A popular variety, producing large red fruits. Oz. 25c, ¼ lb. 75c, lb. $2.25.

PONDEROSA. A purple-fruitied tomato, solid and of good flavor. It is of the very largest size, specimens having been produced weighing 4 pounds. Very few seeds, and quite free from acid. One of the most popular. Oz. 30c, ¼ lb. $1.15, lb. $3.25.

ROYAL PINK. Said to be the best main crop purple-fruitied sort. Very large, solid, smooth, with few seeds, and a heavy yielder. Best shipping sort. Oz. 30c, ¼ lb. $1.15, lb. $3.25.

YELLOW PLUM. Oz. 30c, ¼ lb. 90c, lb. $3.00.

RED PEAR. Oz. 30c, ¼ lb. 90c, lb. $3.00.

TURNIP

PURPLE-TOP WHITE GLOBE. Large, globular; crown purplish red, the remaining portion clear white. Flesh white and of excellent quality. Oz. 8c, ¼ lb. 20c, lb. 75c.

EXTRA EARLY PURPLE-TOP MILAN. Very early, flat, with small tops. Flesh white, sweet and tender. Oz. 10c, ¼ lb. 25c, lb. 80c.

YELLOW GLOBE. Round, smooth, medium sized, yellow, with crisp, firm flesh of fine quality. Oz. 8c, ¼ lb. 20c, lb. 65c.

POMERANIAN WHITE GLOBE. One of the most productive. Globe-shaped, white, smooth. Good quality. Oz. 8c, ¼ lb. 20c, lb. 65c.

GOLDEN BALL or ORANGE JELLY. One of the best flavored yellow turnips grown. Medium size, firm and keeps well. Oz. 8c, ¼ lb. 20c, lb. 65c.

WHITE EGG. Quick-growing, egg-shaped, smooth, white. Very sweet and solid. Oz. 8c, ¼ lb. 20c, lb. 65c.

RUTA BAGA

LONG ISLAND IMPROVED (Purple-Top). Very large, round, with purple top and yellow below. Flesh yellow and of fine flavor. Excellent for table use or stock. Oz. 10c, ¼ lb. 20c, lb. 50c.

PERFECTION WHITE. Flesh white and unusually fine grained. Very large. Good for table use or stock. Oz. 10c, ¼ lb. 20c, lb. 50c.

ALL KINDS OF FARM SEEDS

Prices on all kinds of farm seeds will be quoted promptly upon request. As these seeds are subject to market changes, it is useless to quote prices in this catalog. State quantity wanted and I will quote prepaid prices to any of the Eastern States.

6111 Alder St., Pittsburgh, Pa.,
Sept. 25, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: The strawberry plants came in fine condition. Thank you for favor. Later in the winter please send your catalogue. Will want to give you an order for spring planting. Sincerely yours,

W. C. Maxwell, M. D.

Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: I received the raspberry plants in good order and immediately set them out. Parcel post is certainly quite an institution. I thank you for sending me two kinds without extra charge.

Yours very truly,
Merton Church.

R. F. D. 2, East Chatham, N. Y.,
Aug. 1, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: The celery plants received and they were in fine condition and seem very nice. Yours with respect,

Mrs. S. D. Wadsworth.

471 Central Ave., Pawtucket, R. I.,
Nov. 12, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.
Dear Sir: The grape vines sent by you arrived this day in fine condition and are very satisfactory. I thank you much and shall be glad to place most of my orders for spring 1915 with you.

Yours very truly,
A. G. James.

Total Amount of Order - - -
**Roses**

**Alfred Colomb**—Very large and full. Brilliant carmine; extremely fragrant.

**American Beauty**—Very large and double. Deep pink, shaded with carmine. Fragrance exquisite.

**Baby Rambler**—A dwarf (bush) form of the Crimson Rambler, and ever-blooming. Will bloom continuously throughout the summer.

**Baltimore Belle**—Pale blush, nearly white. Blooms in clusters.

**Crimson Rambler**—An exceedingly vigorous and rapid grower, making shoots eight to ten feet in one season. Entirely hardy and extremely prolific. It blooms in clusters; beautiful crimson color and lasts a long time.

**Dorothy Perkins**—Similar to Crimson Rambler except in color which is a clear shell pink. Blooms in clusters of thirty or forty and sometimes more. Flowers are very large for a rambler, well formed, very double and fragrant. A strong, healthy grower and very hardy.

**Baron de Bonstetten**—Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

**Blanche Robert**—Pure white, large and full; buds very beautiful.

**Coquette des Alps**—White, slightly shaded with carmine. A general favorite.

**Frau Karl Druschki** (Snow Queen)—Pure white, large and of elegant form. There is nothing in white roses quite so fine as this.

**General Jacquemimot**—Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

**La France**—Rich, satiny peach, changing to deep rose; large and full. A constant bloomer and the sweetest of all.

**Magna Charta**—Pink and carmine; fragrant; very large and full; a profuse bloomer.

**Margaret Dickson**—New, hardy and vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center. Delightfully fragrant.

**Marshall P. Wilder**—Bright cherry carmine; very fragrant and one of the freest bloomers. Vigorous.

**Paul Neyron**—The largest of all. Deep rose color. A free bloomer and vigorous grower.

**Persian Yellow**—Deep, bright yellow; small but handsome; double; very early bloomer, and much the finest hardy yellow rose.

**Climbing Roses**

**Baltimore Belle**—Pale blush, nearly white. Blooms in clusters.

**Crimson Rambler**—An exceedingly vigorous and rapid grower, making shoots eight to ten feet in one season. Entirely hardy and extremely prolific. It blooms in clusters; beautiful crimson color and lasts a long time.

**Dorothy Perkins**—Similar to Crimson Rambler except in color which is a clear shell pink. Blooms in clusters of thirty or forty and sometimes more. Flowers are very large for a rambler, well formed, very double and fragrant. A strong, healthy grower and very hardy.

**White Rambler**—Perfectly hardy and a strong, vigorous grower; flowers white.

**Yellow Rambler**—Flowers pale yellow, nearly double; fragrant.

R. F. D 6, North East, Pa., May 14, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: We are in receipt of your letter stating that you were sending us 1500 strawberry plants. We have just received the plants and wish to state that they are the finest plants we have gotten for a good many years. They came all trimmed and bunched ready for planting, and are fine, big, healthy plants. We wish to thank you for these plants, and also for the prompt attention you have given our order. Thanking you again for the plants, I am, H. W. Sornsen.

Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: Trees came all right. Many thanks for same.

Yours truly, O. M. Brit.

East Hampton, N. Y., May 22, 1914.
Mr. Harry L. Squires, Remsenburg, N. Y.

Dear Sir: Your catalogue came in due time; also the strawberry plants in good condition. Truly yours, Daniel W. Talmage.
Apple, Pear, Peach, Plum, Cherry, Quince and Apricot Trees
